Looking to Screen a Large Opening?

Consider the Mirage horizontal series of screens! This versatile and practical horizontal screening system has what you are looking for!

From the H5500 with a 5.5" cassette that spans openings up to 20 feet in width and 12 feet in height, to the H7000 with a 7" cassette and larger internal roller tube that expands the systems reach to 25 feet wide and up to 16 feet high. Mirage can transform virtually any covered space into an oasis of relaxation.

- ✔ Keep your recreational space or garage free of flying insects
- ✔ Cool and shade your patio and interior rooms with solar screen
- ✔ Reduces the cost of heating and cooling your home
- ✔ Appears or stores away, remotely at the touch of button

Cassette Profiles

Fits Your Home and Lifestyle

Able to adapt to your needs, the system can attach to the interior or exterior of your home either mounted to the wall or inside of an opening. With additional site work, both the cassette and tracks can be recessed out of sight.

Side Retention System

This illustration shows a cross section of the side retention system. As the name implies, the system retains or captures the vertical sides of the screen fabric so that it remains in the track while allowing it to slide vertically as the screen is raised and lowered. This is especially helpful during windy conditions when the fabric would otherwise blow out of its track.

Add new dimensions to your home or commercial space.
